

3 Points Elastic Chin Strap ref. 21202

Chin strap in black elastic band 18mm wide and elongation 70-80 with three hooks that attach to the helmet. Due to its design characteristics, it is ideal to be used in the construction industry, shipyards, oil exploitation and mines, construction of tunnels, in sawmills, manufacturing industry, public service companies and in general where there was a risk to losing the helmet.

- **Materials**

Made of elastic nylon tape, which offers maximum durability, comfort, and gentle touch to the skin, avoiding elongation or loss of functionality with its use. Hooks and adjustable tensors in nylon, chin guard in polyethylene. It does not contain metal parts, so it does not alter the dielectric rating of the helmet.

- **Maintenance**

It is recommended to wash the chin strap periodically with cold or lukewarm water and neutral soap, in order to avoid accumulation of dirt and the appearance of fungi and bacteria.

- **Normative compliance**

Applicable Requirements of ANSI Z89.1 Standard
