

Face Shield For Grinding Work ref. 22103

Protects the eyes and face from dust, chips, chips, heat, chemical splashes and other substances that may affect the worker's face. Suitable for grinding, deburring, polishing and shining metal objects with emery, transferring chemical substances, sculpting, carving and brushing wood.

- **Materials**

Visor: Made of high-density ABS polymer. This unites all the elements that make up the mask.

Head: Made of low-density polymer. It holds the mask on the worker's head, it has a ratchet adjustment system that allows it to be adjusted to the user's size.

Lens: Made of PVC, optically rectified, resistant to impact, penetration and chemical stable. Easy exchange.

- **Maintenance**

It should be washed with cold water and detergent-free soaps, after each use, let it dry in the open air, DO NOT clean the visor dry, or use petroleum derivatives such as gasoline or thinner to clean it.

- **Normative compliance**

ANSI Z87.7 "Practice for occupational and educational protection of the eyes and face"

NTC-3610 "Hygiene and safety. Welding shields and facial protectors".
