

Face Shield For Whacking Felling ref. 22104

Recommended for handling chainsaws and weed whackers, or where there is potential danger of projected particles that may impact the eyes or face of the operator.

- **Materials**

Head: Made of soft polymer, it holds the mask on the head, it is adjustable according to the size of the user's head, with an absorbent sweatband.

Skullcap: Made of high-density polymer, resistant to impact and splatter of chemical substances, holds the visor on the head to raise or lower the helmet.

Visor: Made of metal mesh, reinforced on its edge with a rubber profile to prevent the tips of the mesh from hurting the user.

- **Maintenance**

Special care is recommended in the handling and storage to avoid distortion of the visor.

- **Normative compliance**

ANSI Z87.7 "Practice for occupational and educational protection of the eyes and face"

NTC-3610 "Hygiene and safety. Welding shields and facial protectors".
