

Beekeeping Mask ref. 22105

Due to its design characteristics, it is ideal to be used in the beekeeping industry as protection against stings for personnel who perform bee feeding, honey collection, inspection, honeycomb care and general work in apiaries.

- **Materials**

Visor: Dark anti-reflective metal mesh, with holes which diameter prevents bees from accessing the mask and, in turn, allows proper breathing and ventilation.

Sweatshirt and hood: Made of non-woven fabric (Tyvek Type) or drill, light materials and highly resistant to use, sewed together with a high resistance nylon thread.

Head: Ratchet system that facilitates graduation with anti-sweat band.

- **Maintenance**

Periodic gentle washing with cold or lukewarm water and neutral soap is recommended to avoid accumulation of dirt.

- **Normative compliance**
