

Complete Beekeeping Mask ref. 28101

Thanks to the design features, it is ideal to be used in the beekeeping industry as protection from bee stings. It can be used by workers who perform tasks of feeding bees, honey collection, inspection, honeycomb care and general work in apiaries.

- **Materials**

Visor: Metal mesh in dark color anti-glare, with holes whose measurement parameter prevents the access of bees to the mask, allowing correct breathing and ventilation.

Overalls and hood: Made of non-woven fabric (Tyvek type) or drill, lightweight materials and high resistance to use, joined by sewing in high-strength nylon thread with elastics in the termination of the sleeves and at the height of the ankles.

Head: Ratchet system that facilitates graduation with anti-sweat band.

- **Maintenance**

A gentle wash periodically with cold or warm water and neutral soap is recommended, to avoid accumulation of dirt.

- **Normative Compliance**

NTC 3610 "Welding masks and face protectors".
